PROFESSIONAL PROFILE

Third-year Artificial Intelligence & Data Science undergraduate with strong fundamentals in Python, data analysis, SQL, and machine learning basics. Actively seeking internship opportunities to apply analytical skills, gain real-world industry exposure, and contribute to data-driven and AI-based solutions.

EDUCATION

B.E in Artificial Intelligence & Data Science (Ongoing) — May 2023-2027
TERNA ENGINEERING COLLEGE, NERUL - 8.3 CGPA

HIGHER SECONDARY EDUCATION — March 2023
INDIAN MODEL JUNIOR COLLEGE, ULWE – 83.83%

SECONDARY EDUCATION — March 2021
D.A.V PUBLIC SCHOOL, NERUL – 92.2 %

TECHNICAL SKILLS

- Programming Languages: Python
- Web Technologies: HTML, CSS
- Database: MySQL (basic)
- Tools: PyCharm, VS Code
- Concepts: Data Analysis, Machine Learning Basics

PROJECT EXPERIENCE

- ATM Simulation System in Java

Developed a console-based ATM simulation in Java using OOP concepts with features like PIN authentication, balance inquiry, deposit, and withdrawal.

- Neighborhood Navigator using Python:

Developed a Python-based, data-driven system to identify nearby essential services using location data. This project enhanced my problem-solving, data handling, and analytical skills.

- AI-Based Social Media Sentiment Analysis & Virality Prediction

Built an AI system in Python to classify social media posts into positive, negative, or neutral sentiments and predict post virality. Performed text preprocessing, feature extraction, and applied machine learning for analysis and visualization.

STRENGTHS

- Strong learning attitude
- Good teamwork and communication skills
